

Web Hosting Solutions

Web Hosting Services from Manage.net

Manage.net offers full featured web hosting packages that include everything you'll need to get your site up and running, and keep it available 24/7/365. If you want to shop for all-you-can-eat, bronze, silver, gold, platinum, tin, we recommend the back of any internet magazine. But if you want a local trusted-source provider who will work with you every step of the way, from getting things running to scaling to meet demand, Manage.net has your solution. Take a look at some of the benefits:

Multi-platform support– From open source Linux and Apache based web platforms to Microsoft Internet Information Server, we work with you to choose the appropriate platform for your applications specific requirements.

Web Server Capabilities – We support a variety of standard and customer supplied CGI scripts and various scripting languages and techniques including Perl, PHP, Python, Java Servlets, SSI, ActiveX, ASP, Frontpage 2002 extensions, and .net. If you're just getting started with some of these techniques, we can also provide basic mailform scripts for customer feedback pages.

Full Web Site Statistics Included– We use a real-time system for usage reporting that gives you up-to-the-minute live statistics of your website usage in addition to weekly and monthly summaries automatically e-mailed to your reviewers. The web-based interface allows you quickly and easily access highly detailed reporting and analysis tools for your site.

Database Support– To support your growing web application, we support Interbase 6 SQL, MySQL PostgreSQL, MS SQL, ODBC, Cold Fusion.

Migration– We are experts in smoothly migrating e-mail from your current provider or in-house solution. We will arrange all your domain name modifications and establish accounts and aliases as required. Give us a call and we can discuss your requirements and describe the whole process from start to finish.
